**Professional Summary:**

Software Engineer with experience in innovative software development, offering a robust technical skillset and a track record of leading and implementing various web-based initiatives. Committed to leveraging technology to drive organizational efficiency, ensuring the creation of fault-tolerant, high-performance integrations. Skilled in translating business needs into technical requirements, demonstrating leadership, and staying current on technology trends.

**Work Experience:**

**IBM, Armonk, NY**

Software Engineer

May 2022 – May 2023

- Utilized agile to contribute to the development of the IBM Drupal search website impacting IBM web traffic.
- Designed and adjusted the backend API to incorporate new functions for the Drupal Search Engine.
- Utilized git to perform regression testing for the Drupal Search System
- Collaborated with front-end developers to create an intuitive search system that impacted user experiences.
- Utilized Jira to share pertinent information with teammates impacting the scheduled release of IBM applications.
- Developed API-based survey for users, directly increasing the user data acquired.

**Yes&, Alexandria, VA**

Front-end Web Developer

May 2021 – December 2021

- Developed and maintained backend API websites based on user-led research for an optimal user experience.
- Maintained and analyzed back-end development using Jira: updated broken links, image ALT tags, meta descriptions, and SEO-friendly URLs.
- Executed client request updating API, altering images, and improving overall user experience.
- Worked with clients as a project manager to create solutions that would lead to business success.

**Jasaron Learning Institute, LLC, Chesapeake, VA**

Web Designer, Coordinator

Contract Work May 2019 - May 2021

- Created the company website implementing a new layout/user interface using standard HTML/CSS practices.
- Maintained the company website from layout to function.
- Executed front-end updates per client request to ensure a positive experience.
- Integrated data from various back-end services and databases utilizing HTML and Square Space
