PROFESSIONAL SUMMARY

Senior Front-End Platform Engineer with 5+ years of experience specializing in Content Management Systems (Drupal 10, WordPress) and ReactJS. Proven record in full-lifecycle web application development, achieving 100% uptime on mission-critical platforms, and driving efficiency through CI/CD and Agile methodologies. Expertise in API integration, responsive design, and robust debugging to deliver scalable, user-centric web experiences.

CORE COMPETENCIES AND SKILLS

- **Front-End & Languages:** JavaScript (ES6+), HTML5, CSS3, PHP, UX/UI Optimization, Figma, ReactJS
- **CMS & Frameworks:** Drupal 10 (and earlier), WordPress, Web Template Design
- **DevOps & Practices:** CI/CD, Agile/Scrum, Git, Linux, SAAS, API Integration
- **Cloud & Tools:** Google Firebase, Firestore, AWS, Netlify, Github Actions, npm, Debugging

PROFESSIONAL EXPERIENCE

Senior Web Platform Developer

Freddie Mac, Mclean, VA   **June 2024 – September 2025**

- Maintained and stabilized a mission-critical web ecosystem through proactive maintenance and complex content deployments, successfully achieving and sustaining 100% platform uptime.
- Led the technical execution of a complex platform migration, architecting a new front-end experience from legacy systems and strictly ensuring compliance with internal Freddie Mac design principles.
- Managed the end-to-end content deployment pipeline, integrating dynamic assets within the Drupal architecture to ensure content freshness and seamless user narrative.

Senior Web Coordinator

Jasaron Learning Institute, LLC, Chesapeake, VA   **May 2023 – June 2024**

- Developed and deployed customized, responsive user interfaces using standard HTML5/CSS practices to align with client educational goals.
- Managed all aspects of client website maintenance, encompassing front-end layout modifications, back-end functionality, and performance optimization.
- Leveraged market research and UX/UI practices to enhance site usability.

Drupal Developer

IBM, Armonk, NY   **May 2022 – May 2023**

- Engineered search query capabilities in Drupal by introducing a Component parameter, facilitating more nuanced and targeted content discovery for end-users.
- Developed a diagnostic script to reconcile published Drupal content against the Enterprise Search index, successfully resolving customer-reported search issues by addressing broken links and ensuring accurate content indexation.
- Automated website visibility and SEO efforts by managing Drupal sitemaps and integrating with Google Search Console for real-time updates and debugging.

Jr Web Developer

Yes&, Alexandria, VA   **May 2021 – December 2021**

- Contributed to both front-end and back-end development across various projects utilizing open-source CMS platforms (Drupal and WordPress).

EDUCATION

George Mason University, Fairfax, VA

- M.A. in International Commerce and Policy, May 2023
- B.S. in Information Technology, May 2021
