PROFESSIONAL SUMMARY

Web developer specializing in Drupal and front-end development for public and member-facing CMS sites. Experienced in Drupal and WordPress using PHP, HTML, CSS, and JavaScript, including templates, brand standards, content publishing, search, content migration, and CMS training. Also builds front-end interfaces in React.

CORE COMPETENCIES AND SKILLS

Drupal 8–11, PHP, Twig, WordPress, HTML5, CSS3, JavaScript, React, Next.js, Git, CI/CD, content management systems (CMS), responsive design, accessibility (WCAG), SEO, Google Analytics, Google Search Console, content migration, content publishing, templates, brand standards, Figma, Jira

PROFESSIONAL EXPERIENCE

Web Development Specialist (Contract)

February 2026 – Present

Touchstone Energy Cooperative, Inc., Arlington, VA (Hybrid)

- Run day-to-day operations in Co-op Web Builder, a CMS used by 400 member co-ops and 650 member-facing websites.
- Build and update member websites from program templates so brand, layout, and structure stay consistent.
- Consult members on content, layout, multimedia, and Touchstone Energy brand standards before pages go live.
- Troubleshoot publishing problems and take site requests from intake through a live fix.
- Train members on the CMS so they can manage their own pages after launch.
- Review live sites for accuracy, broken content, and brand drift. Own request, build, review, publish.

Web Platform Developer (Contract)

June 2024 – September 2025

Freddie Mac, McLean, VA (Hybrid)

- Kept a mission-critical Drupal web ecosystem at 100% uptime through maintenance and content deploys.
- Owned the content lifecycle on high-traffic public Drupal properties: create, review, publish.
- Reviewed pages before go-live for accuracy, compliance, and design-system fit.
- Recreated pages during a platform content migration to match new Freddie Mac design specs.
- Integrated dynamic assets in the Drupal publishing pipeline so content stayed current.
- Fixed publishing issues blocking releases. Liaison between technical teams and requestors.

Drupal Developer (Contract)

May 2022 – May 2023

IBM, Remote

- Extended Drupal Search in PHP with a Component parameter so users could run more precise queries.
- Reviewed Drupal Search and Push modules that send component data to Enterprise Search and Support Search with Watson.
- Wrote a diagnostic script to compare published Drupal content against the Enterprise Search index.
- Resolved search gaps by repushing content or removing bad links.
- Debugged Drupal sitemaps and automated Google Search Console updates for discoverability.
- Supported releases: Drupal publish API, repush scripts, and regression tests. Used Jira for the ship cadence.

Drupal Web Developer

May 2021 – December 2021

Yes& Agency, Alexandria, VA (Remote)

- Built responsive Drupal and WordPress sites across front-end and back-end for client work.
- Shipped UX and performance changes from Google Analytics, heat maps, and customer-journey notes.
- Front-end HTML, CSS, and JavaScript updates from client feedback so pages were easier to use.
- SEO maintenance: broken links, image ALT text, meta descriptions, and cleaner URLs.
- Worked from functional requirements through to published pages on deadline.

Senior Web Coordinator (Contract)

May 2020 – June 2024

Jasaron Learning Institute, Chesapeake, VA (Remote)

- Built custom websites and responsive HTML/CSS layouts for the institute.
- Analyzed point-of-sale systems and related data. Systems analysis work tied to a 10% gain in customer satisfaction.
- Translated functional requirements into working pages and front-end updates. Prepared management reports from site and system data.

EDUCATION

George Mason University, Fairfax, VA — M.A., Commerce and Policy (May 2023); B.S., Information Technology (May 2021)
